

KEY DRIVERS OF SOCIAL INNOVATION IN SOCIAL SUPPORT AND LONG TERM CARE

Alan Walker

**Professor of Social Policy & Social Gerontology
University of Sheffield, UK**

**International Conference on the Old Age Unites, Prague,
22nd May 2019**

KEY DRIVERS OF SOCIAL INNOVATION IN SOCIAL SUPPORT AND LONG TERM CARE

AGENDA

- Social Innovation
- Long Term Care: the Welfare State's Poor Relation
- Key Drivers of Social Innovation in LTC
- LTC and Active Ageing

KEY DRIVERS OF SOCIAL INNOVATION IN SOCIAL SUPPORT AND LONG TERM CARE

KEY MESSAGES

- LTC has always been the Cinderella service of the welfare state, a position that is not morally sustainable in ageing societies
- There is a fundamental division in Europe between those countries that have well-established, publicly-funded LTC systems with dedicated funding, and those for which LTC is a new and developing (or stagnating) sector with insecure and often insufficient resources
- Lack of public funding is a barrier not only to traditional LTC services but also to SIs – it is essential therefore to boost funding
- Social innovation may be seen as a positive approach to LTC but it may also be seen as substitute for public investment
- It is important to evaluate the impact of SIs
- A critical element of LTC policy is active ageing – to prevent the need for LTC

MOPACT RESOURCES

Pension Fund

MOPACT

Improving private pensions and retirement planning

Policy priority: The design process for pension products should be improved to support pensioners, taking account of sustainability, investment, investment risk, and addressing pension risk, and contributing to their financial resilience and financial security.

Key Findings:

- Private pensions are needed to supplement public pensions and the benefits which are not provided for by public pensions and the benefits which are not provided for by public pensions.
- The European Commission should consider measures to improve the design of private pensions, taking account of sustainability, investment risk, and addressing pension risk, and contributing to their financial resilience and financial security.
- The design of private pensions can be improved by the introduction of measures to support pensioners, taking account of sustainability, investment risk, and addressing pension risk, and contributing to their financial resilience and financial security.

MOPACT

Promoting the Participation of Seniors in Policy-Making

Policy priority: Legible, visible and inclusive bodies to represent the views of older citizens on the issues such as private pensions, health care, transport and other services.

Summary:

- The involvement of seniors in policy-making is essential for the success of public services.
- Seniors are best placed to inform the development of public services.
- The involvement of seniors in policy-making is essential for the success of public services.
- Seniors are best placed to inform the development of public services.

Key Findings:

- Seniors are best placed to inform the development of public services.
- Seniors are best placed to inform the development of public services.
- Seniors are best placed to inform the development of public services.
- Seniors are best placed to inform the development of public services.

MOPACT

Health and Well-being

Policy priority: Public health strategies should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

Summary:

- Public health strategies should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public health strategies should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public health strategies should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public health strategies should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

MOPACT

Extending Working Lives

Policy priority: Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

Summary:

- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

MOPACT

Biosensorology: a novel tool to stay healthy in old age

Policy priority: Funding research in biosensorology to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

Summary:

- Funding research in biosensorology to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Funding research in biosensorology to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Funding research in biosensorology to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Funding research in biosensorology to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

MOPACT

Welcome to MOPACT

Policy priority: Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

Summary:

- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

MOPACT

Economic effects of population ageing

Policy priority: Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

Summary:

- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

MOPACT

Built and technological environment

Policy priority: Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

Summary:

- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

MOPACT

Potentials for active ageing by social innovation in long-term care and social support

Policy priority: Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

Summary:

- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.
- Public policies on extending working lives should be developed to support the health and well-being of older citizens, taking account of their specific needs and the needs of their families and carers.

INNOVAGE

Social Innovations for Active and Healthy Ageing

The screenshot shows the innovAge website with the following elements:

- Header:** "innovAge" logo and the tagline "SOCIAL INNOVATIONS PROMOTING ACTIVE AND HEALTHY AGEING".
- Navigation:** "About the project", "Project partners", "Active ageing", "Social innovation", "News & Events", "Resources", "Innovations Portal".
- Image Grid:** A grid of photos of elderly people.
- Text:** "INNOVAGE was dedicated to developing and testing, as well as surveying and cataloguing, social innovations that will have a solid impact on improving the quality of life and well-being of older people. It ended in 2015 but this site will continue to host the project activities and findings. Find out about work and progress towards..."
- Buttons:** "Active ageing" and "Social innovation".
- Footer:** "Resources".

The screenshot shows the "EVENTS" and "NEWS" section of the website with the following details:

- EVENTS:**
 - Oct 14 2015:** INNOVAGE Final Conference. The closing conference took place on 14 October 2015 in Brussels. [more information](#)
 - May 06 2015:** Providing carers, care Europe. On 6-7 May 2015 a platform in Brussels. [more information](#)
 - May 19 2015:** INNOVAGE. The third INNOVAGE event took place on the 19th May 2015. [more information](#)
 - Sep 25 2014:** INNOVAGE. The second INNOVAGE event took place in Latvia. [more information](#)
- NEWS:** (Empty)

The screenshot shows the "In this section" menu with the following items:

- About Innovage
- Overview
- Steering committee
- Team
- Contact us

The screenshot shows the "Resources" page with the following details:

- Filters:** WEBLINK - PROJECT (28), PUBLICATION (10), FINDINGS (6), WEBLINK - NETWORK (4). [SHOW ALL \(42\)](#)
- Resource 1:** INNOVAGE Newsletter 2. PDF, 4M. Welcome to the second newsletter of the INNOVAGE project, which includes updates on not just our activities over the last year or so, but on the burgeoning environment of social innovation for active and healthy ageing across the EU.
- Resource 2:** Project findings for User-driven housing for older people. PDF, 72K. One of INNOVAGE's social Innovations.
- Resource 3:** Project findings for Long-term care in motion. PDF, 59K. One of INNOVAGE's social Innovations.

THE EUROPEAN INNOVATION PARTNERSHIP

“Innovation contributes to tackling the most critical societal challenges we are facing. Europe’s expertise and resources must be mobilized in a coherent manner and synergies between the EU and the Member States must be fostered in order to ensure that innovations with a societal benefit get to the market quicker. The launch of the pilot Innovation Partnership on active and healthy ageing is an important step in that context.”

European Council, 4 Feb 2011

SOCIAL INNOVATION

Social innovation is about new ideas that work to address pressing current needs... innovations that are both social in their ends and in their means. Social innovations are **new ideas** (products, services and models) that simultaneously **meet social needs**... and **create new social relationships** or collaborations. (Murray, et al, 2010.)

...the development and implementation of **new ideas** (products, services and models) to **meet social needs** and **create new social relationships** or collaborations.... Social innovations are innovations that are social in their ends and their means. (European Commission, 2013: 6)

SOCIAL INNOVATION AND ACTIVE AGEING

Active ageing should be a comprehensive strategy to **maximise participation and well-being as people age**. It should operate simultaneously at the individual (lifestyle), organisational (age management) and societal (policy) level and at all stages of the life course. (Walker, 2009; FUTURAGE, 2011)

Social innovations are ideas, products, services or models that are new or applied in new contexts, and which are **designed to improve the well-being and quality of life of people as they age**.

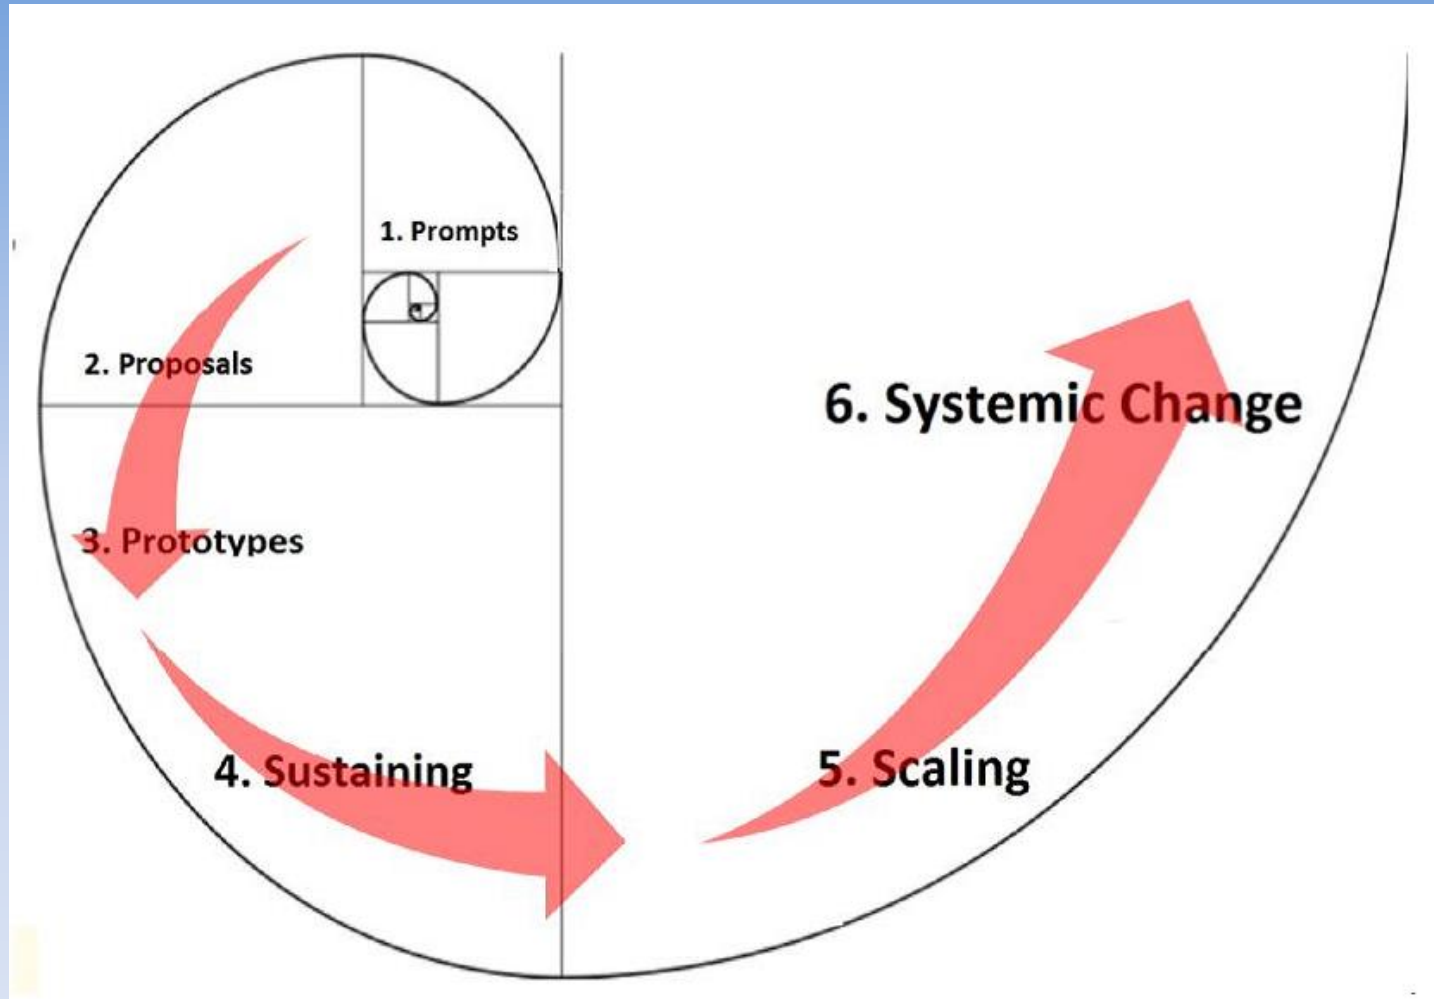

SOCIAL INNOVATION AND LTC

CRITERIA

- Oriented towards exceptional societal challenges
- Suggests approaches that are 'new' in a particular societal, cultural and economic context
- Creates new social practices to overcome shortcomings in traditional arrangements
- Overcomes traditional dichotomy between social and technological innovations
- Promotes integration or collaboration between stakeholders that have previously not cooperated
- Includes reflexive and multidisciplinary approaches
- Creates structures and processes that are sustainable
- Involves end-users as co-producers

Filo d'Argento (Silver Thread)

ORGANISATION: Auser (initiative of the Union of Retired People & the Federation of Italian Trade Unions)

COUNTRY: Italy

DOMAIN: Preventing loneliness

STAGE: Mature

PRIMARY IMPACT: Volunteering

Silver Thread provides a toll free telephone service that enables older people to enjoy social support/companionship from one of over 20,000 volunteers from across all regions of ...

PUBLIC SPENDING ON LTC AS % GDP

Source: OECD Health Statistics 2018

CHALLENGES CONFRONTING LTC

- Low Policy Priority: Enduring Care Gap
- Population Ageing and Multimorbidity
- Increase in Older People Living Alone
- Gendered Nature of LTC
- Division Between Health and Social Care Systems
- Workforce: shortages, low skill, variable quality

THE CARE GAP

RECIPIENTS OF LTC 65+ AS % OF TOTAL 65+

| | | | |
|-------------|------|-----------|------|
| Austria | 17.9 | Bulgaria | 3.9 |
| Germany | 12.3 | Romania | 1.2 |
| Netherlands | 19.5 | Italy | 14.3 |
| Estonia | 7.8 | Lithuania | 1.6 |
| Spain | 8.1 | Latvia | 5.3 |
| Portugal | 1.3 | UK | 17.5 |
| Hungary | 10.1 | Finland | 12.0 |
| Czechia | 13.5 | Sweden | 15.2 |
| Slovak Rep | 6.7 | | |

LONG TERM CARE REGIMES

| | Demand for care | Provision of informal care | Provision of formal care | Acknowledgement of LTC as a social risk | Countries |
|---|-----------------|----------------------------|--------------------------|---|---|
| Standard-care mix | Medium – high | Medium | Medium | Early movers | Germany, Austria, France, UK |
| Universal-Nordic | Medium | Low | High | First movers | Denmark, Finland, The Netherlands, Sweden |
| Family based | High | High | Low | Late movers | Spain, Italy, Portugal, Ireland, Greece |
| Central & Eastern European (CEE) | Low – medium | High | Low | Starters | Hungary, Poland, Czechia, Slovakia, Romania, Bulgaria, Estonia, Latvia, Lithuania |

IMPROVING PROSPECTS FOR SI IN TRANSITION COUNTRIES?

MACRO LEVEL

- **Identity and value building:** signs of policy awareness and some actions
- **Policy and governance:** retrenchment in some countries but new investments in others

MESO LEVEL

- **Processes and pathways:** emerging role of NGOs as coordinators between public authorities and LTC service users, and organising training for professionals. Innovative pilot programmes initiated by NGOs
- **Management and leadership:** little evidence of innovation
- **Education, resources and means:** NGOs often fill the gap in mapping needs and providing training

MICRO LEVEL

- **Organisational structures:** new cooperations between NGOs, other stakeholders and local public authorities
- **People:** growing recruitment and involvement of volunteers in management of initiatives and actual provision of LTC

Source: Schulmann & Leichsenring, 2014

EXAMPLES OF SIs IN TRANSITION COUNTRIES

Home Care and Assistive Services – Bulgaria

- Bulgarian Red Cross (Vratza Region)
- Provision of health and social care services at home
- SI status: new solution to major societal challenge, new social practices to fill gap in traditional arrangements, new roles and partnerships, new structures and processes
- LTC challenges: multidisciplinary, user centred, tackling barriers between health and social care, strengthens users/patients capacities, case management, evaluated
- Benefits: enables older people to live independently, reduces health care costs, new job profile ‘home helper’, staff training, framework for sustainability

EXAMPLES OF SIs IN TRANSITION COUNTRIES

Integrated Help-at-Home - Lithuania

- Local municipalities (21 out of 60) European Social Fund
- Mobile teams to provide wide range of health, social care and counselling
- SI status: meets exceptional social challenge, new solutions in a particular societal, cultural and economic context, new social practices to fill gap in traditional arrangements, promotes integration/partnerships in services, multidisciplinary, end users as co-producers, sustainable framework
- LTC challenges: user-centred, overcomes barriers between health and social care, care needs assessed by multidisciplinary team, strengthens capabilities of service users, quality assurance guaranteed, integrated single access point
- Benefits: funding helps to overcome silo thinking and allows carers/facilitators to respond to specific user's needs, multi-functional teams provide different services to support quality of life of older people, nurses provide services that were previously available only in hospitals, creation of new social ties and local relations based on solidarity

POLICY PRIORITIES FOR SI IN LTC

- Establishing and Expanding LTC Systems
- Realising Community-Based Care
- Integrating and Coordinating LTC
- Up-skilling the Workforce
- Emphasise Active Ageing

REALISING COMMUNITY-BASED CARE

- Differences between care regimes but nowhere mainstream
- Hampered by centre-local blockages – need for a clear division of responsibilities: local authorities should plan and coordinate care services with national funding
- Need for community infrastructure of all stakeholders
- Key to community-based care is embeddedness in local infrastructure
- Essential to systematically evaluate SIs and scale-up successful ones with public funding
- Service planning should be based on needs assessments that involve services users and carers
- Appropriate regulatory and financial support from national governments

INTEGRATION AND COORDINATION OF LTC

- Fragmentation of services a major barrier to effective care
- LTC divisions: health and social care/formal and informal care
- Need for SIs in coordination and integration
- Expand networks of social support
- New job profiles: case manager, network coordinator, social animator, mediators – identified as key to successful SIs
- Divisions of governance: health/social care, centre/local – overcome barriers by inter-sectoral dialogues and a SI Fund for LTC

LTC WORKFORCE

- Shortages of qualified care professionals in all care regimes
- Dangers of privatisation: race to the bottom with low skilled, low paid, insecure workforce. A poor workforce will provide poor care
- Problems of migration: migrant care workers a solution to staff shortages in destination countries but exacerbate the shortage in sending countries (largely CEE)
- Neglect of need for LTC in rural areas: need for SIs
- ICTs and staff training: can be a barrier if staff not trained

ACTIVE AGEING AND LTC

- Focus on the life course with the aim of preventing the need for LTC or reducing the degree of need
- The neglected role of secondary prevention: it is never too late
- Great potential for intergenerational support in active ageing programmes
- Mixture of top-down support and bottom-up innovation in approaches to active ageing
- Active ageing focus aids coordination and integration of different sectors

KEY DRIVERS OF SOCIAL INNOVATION IN SOCIAL SUPPORT AND LONG TERM CARE

AGENDA

- Social Innovation
- Long Term Care: the Welfare State's Poor Relation
- Key Drivers of Social Innovation in LTC
- LTC and Active Ageing

KEY DRIVERS OF SOCIAL INNOVATION IN SOCIAL SUPPORT AND LONG TERM CARE

KEY MESSAGES

- LTC has always been the Cinderella service of the welfare state, a position that is not morally sustainable in ageing societies
- There is a fundamental division in Europe between those countries that have well-established, publicly-funded LTC systems with dedicated funding, and those for which LTC is a new and developing (or stagnating) sector with insecure and often insufficient resources
